# Preface

This pdf acts as a manual to understand the OmniTrans jobs, their purpose, inputs and outputs.

**Part I**

**Standard Uitvoer**

# 1 Matrix bewerkingen

This group of jobs deal with various matrix handling techniques.

## 1.1 Fratar Methode

### 1.1.1 Purpose

Look inside each tab to understand what you will get from this job.

### 1.1.2 Inputs

Following are the inputs to this job.

```
fratarTest.source_cube = '2020_KAL' # Geef MatrixCube op (hier: 2016_SMC)
fratarTest.matrix = [1,2,1,103]      # Geef Matrix (1 PER AANROEP!) (Hier Auto OS)
```

### 1.1.3 Outputs

Following are the outputs to this job.

```
fratarTest.destination_cube = 'FratarDemo' # Resultaatcube
```

### 1.1.4 Code

Download the code.[matrixcompress.rb](#)

## 1.2 Matrixritten op basis van voorbeeldzone

### 1.2.1 Purpose

Some text explaining what the code does.

### **1.2.2 Inputs**

Following are the inputs to this job.

### **1.2.3 Outputs**

Following are the outputs to this job.

### **1.2.4 Code**

Download the code.[matrixcompress.rb](#)

## **1.3 Percentage groei ten opzichte van voorbeeldzone**

### **1.3.1 Purpose**

Some text explaining what the code does.

### **1.3.2 Inputs**

Following are the inputs to this job.

### **1.3.3 Outputs**

Following are the outputs to this job.

### **1.3.4 Code**

Download the code.[matrixcompress.rb](#)

## 2 Matrix Compressies

### 2.1 Purpose

Some text explaining what the code does.

### 2.2 Inputs

Following are the inputs to this job.

### 2.3 Outputs

Following are the outputs to this job.

### 2.4 Code

Download the code.[matrixcompress.rb](#)

## 3 Voertuigprestaties

### 3.1 Purpose

Some text explaining what the code does.

### 3.2 Inputs

Following are the inputs to this job.

### 3.3 Outputs

Following are the outputs to this job.

### 3.4 Code

Download the code [matrixcompress.rb](#)

## 4 Thermopunten

### 4.1 Purpose

Some text explaining what the code does.

### 4.2 Inputs

Following are the inputs to this job.

### 4.3 Outputs

Following are the outputs to this job.

### 4.4 Code

Download the code [matrixcompress.rb](#)

## 5 Skim Matrix Exports

### 5.1 Purpose

Some text explaining what the code does.

### 5.2 Inputs

Following are the inputs to this job.

### 5.3 Outputs

Following are the outputs to this job.

### 5.4 Code

Download the code.[matrixcompress.rb](#)

# **Part II**

## **Routines**

This folder contains the crypted files.

## 6 Bereikbaarheid

### 6.1 Purpose

Some text explaining what the code does.

### 6.2 Inputs

Following are the inputs to this job.

### 6.3 Outputs

Following are the outputs to this job.

### 6.4 Code

Download the code [matrixcompress.rb](#)

## 7 Selected Link Compress

### 7.1 Purpose

Some text explaining what the code does.

### 7.2 Inputs

Following are the inputs to this job.

### 7.3 Outputs

Following are the outputs to this job.

### 7.4 Code

Download the code.[matrixcompress.rb](#)

## 8 INEXDO

### 8.1 Purpose

Some text explaining what the code does.

### 8.2 Inputs

Following are the inputs to this job.

### 8.3 Outputs

Following are the outputs to this job.

### 8.4 Code

Download the code.[matrixcompress.rb](#)

## 9 Milieu

### 9.1 Purpose

Some text explaining what the code does.

### 9.2 Inputs

Following are the inputs to this job.

### 9.3 Outputs

Following are the outputs to this job.

### 9.4 Code

Download the code.[matrixcompress.rb](#)
